Full-stack engineer with a track record of designing, developing, and deploying mission-critical features for a high-concurrency EdTech SaaS learning platform. Expertise in Python, Django, and modern frontend frameworks, with hands-on work across third-party API integrations, AI-powered features, and billing systems.

EXPERIENCE

Full-Stack Software Developer Sep 2024 - Present
Testpress

End-to-end development of critical features for a large-scale Learning Management System (LMS), improving functionality, user experience, and platform revenue streams.

- Led the end-to-end integration of the Stripe payment gateway and built custom automated billing models, expanding platform revenue streams (20% increase in international sales).
- Developed a conversational AI helpdesk with ChatGPT and Gemini plus an automated Mistral AI OCR document extraction pipeline, improving student engagement and support efficiency (resolving 1,000+ daily queries per client).
- Engineered Microsoft Teams and Zoom OAuth integrations to automate bulk class scheduling, webhook event tracking, and cloud recording imports (4,000+ automated sessions for clients).
- Built a modern SSC exam engine in Vue.js with dynamic sectional timers, advanced gap-fill question types, and integrated Desmos calculators, serving 100,000+ candidates for the Veranda Race client.
- Optimized key API endpoints and migrated heavy data exports to asynchronous Celery tasks, reducing database queries by 40% and improving response times under load.

EDUCATION

Bachelor of Computer Science Dec 2025
IGNOU, Delhi

SKILLS

Languages	Python · JavaScript · SQL · HTML · CSS · Java
Frameworks & Libraries	Django · React · Vue.js · Express.js · Tailwind CSS · Redux · Next.js · Node.js
Databases	PostgreSQL · MongoDB
Tools & Platforms	Celery · Git · GitHub · Docker · AWS (S3) · Vercel · Figma · Webpack

CERTIFICATIONS

Full Stack JavaScript
The Odin Project
